**Prvohory**

Prvohory je prvá geologická etapa, ktorá vznikla pred približne 250 miliónmi rokmi. Vyznačuje sa výskytom prvohorných živočíchov a rastlín.

**Druhá etapa Trilobity**

Trilobity sú prvohorné živočochy, ktoré žili v prvohorách. Sú to najväčšie a najznámejšie prvohorné živočochy. Ich telo bolo rozdelené na tri časti: hlavu, brucho a nohy.
